Lights on the west and north sides will be switched together, while the south and east fixtures will be switched independently – for a total of three switches. The light fixtures will be aimed downward and will not have motion sensors. ▪ SHARC has agreed to extend the anticipated completion time of Carter’s improvement project for another 12 months – to approximately 06/30/06 with the understanding from Carters that they will make every effort to complete their project sooner. ▪ Deb will provide Carters with written correspondence from SHARC confirming the above.
